PROFESSIONAL SYNOPSIS

COMPANY 1, United Kingdom 2009-Present

Rigging Supervisor / Deck Foreman: Hold chief leadership and management accountability for all heavy lifts with 300 ton Crane Subsea Structures, Umbilical Pipe Lay Jumpers, and Risers for company's Uruguá -Mexilhão BRAZIL project. Supervise lifts from 1 to 300 ton, monitoring and maintaining optimum safety and productivity. Provide decisive leadership and direction for multi-cultural team comprised of 1 Lead Rigger, 8 Riggers, 2 Crane Operators, 1 Welder, and 1 Mechanic.

COMPANY 2, South China Seas 2008-2009

Rigging Supervisor/Deck Foreman: Supervised all rigging and lifting operations onboard multi-support vessel, Rubicon Maverick; with focus on repairing main oil line in South China Seas. Transferred to main off Singapore to assist with work pack development, and creation of lifting plans for reinstatement of umbilical flow line. Sourced all lifting equipment from local vendors. Instruct multi-cultural workforce in safety awareness and correct lifting practices.

COMPANY 3, Various Locations 1999-2007

Key contributor to multiple, large-scale projects, fulfilling numerous critical roles including Rigging Supervisor, Rigging Advisor, and Shift Supervisor. Enhanced and expedited major projects encompassing subsea piling, manifold installation, umbilical lay, flowline lay, fibre optic lay and riser installation, FPSO anchor chain and cable installation, suction anchor installation, riser pull-ins and subsea field abandonment. Skilfully coordinated all aspects of resource optimisation, process reengineering, team motivation, and strategic planning. Monitored project efficiency, implementing quality and cost control strategies while maintaining compliance with safety regulations and engineering specifications.

Notable Projects:

Gulf of Mexico, Hurricane Katrina Salvage and Repair work; performed Pigging and Flushing Ops BP Rhum Field, and Laying of Link Lock Mattresses off the coast of Great Yarmouth. Developed all lifting plans and risk assessments. Executed tool box talks with vessel riggers and crane ops.

Served as Deck Foreman and Inspector for Equatorial New Guinea Baobab Project. Coordinated installation of 70 x Link Lock mattresses.

Project for Total Laying of 115 compact stands. Chaired all risk assessments and toolbox talks with Vessel Manager and client.

Worked onboard of various support vessels as major contributor to world's 1st recovery of crude of oil from wreck of Prestige oil tanker, at the depth of 4000 meters.

Note: Additional experience includes roles as **Rigging Foreman** for COMPANY 4 **Rigging Chargehand** for COMPANY 5; and **Rigger** for additional companies. Details on request.
